You can grow delicious fruit like this for yourself at very small expense and little trouble. Have you ever noticed the difference in flavor of fruit bought at your grocer's and the fresh fruit picked from your own trees?

PRICES FOR 1913

All Kinds of Trees, Plants, Vines, Etc.
We Make a Specialty of Growing
Quality Trees.

WHY OUR TREES ARE THE BEST

Our aim for thirty-three years has been to produce only the highest quality in our trees and plants. We have spent an enormous amount of money and years of labor on our Experimental Farm, trying out new methods of growing, cultivating, etc. We have gradually improved the quality of our trees over other growers, until now our stock is recognized by the leading orchardists as the best in the country.

There is no one kind of soil that will produce the highest quality in every class of tree or plant. Each class or group of classes requires a different soil to bring the best results. For instance, the group of which apples and pears are examples, requires a heavy clay soil, while the group which includes peaches and cherries does better on a loose sandy loam.

We have several farms and on each farm we grow only that group which does best on that farm. So you see we produce in each tree or plant the highest quality that is possible to produce. To begin with we have the finest land to grow on. Then we use only the finest seedling stock to bud or graft our trees on. All our buds and scions are selected from bearing trees in our own orchards. We feed our trees all the fertilizer they will take. We cultivate all of our farms with as much care as if they were gardens. And most important of all—the men who are growing these trees for us have been with us for the past twenty-five or thirty years, and are now experts in tree and plant growing. Some of our men have sons who were born and have been brought up on our nurseries and who know the business of growing from top to bottom. They are experts in their respective departments. Don't overlook this important factor.

If you want quality stock at a reasonable price you had better give us a trial. We have a catalog giving complete description and prices of everything we have to offer. If you have not a copy send us a postal card and we will mail you one.

Green's Nursery Co., Rochester, N. Y.

If you look closely at this illustration you will notice that the trees are loaded with beautiful apples. Do you realize that a small orchard of apple trees like this would take care of you in your old age, or a few trees not only supply you with what you want to eat but enable you to buy a few luxuries that you feel you cannot afford now?

A view of the Collamer Apple Orchard at Hilton, N. Y. Note the clean cultivation.

APPLES

Prices of General Varieties—not Starred*
Two to Three Year Apple Trees

	Each	10	100

These are Sweetheart strawberries, the variety that we are offering as a premium. Prof. H. E. Van Deman, the noted pomologist, declares it is one of the best varieties he has ever seen. We offer 5 of these plants and Green's book on fruit growing with each \$5.00 to \$10.00 order and 10 plants and Green's book with each \$10.00 (or over) order, if order is received on or before March 15, with cash.
